

GUARDIAN®
STAFF SAFETY SYSTEMS

From its inception Guardian Staff Safety Systems is now recognised as the leading provider of staff safety and protection systems. It is the preferred choice for Her Majesty's Probation Service, along with many other authorities and institutions across the Globe.

The Guardian philosophy is to lead and not follow. Therefore, our systems incorporate many unique features which we believe provide a safer working environment for staff at risk in the workplace. We have developed our systems using IP technology. This enables simple integration with other security elements and communication devices.

The legal welfare and responsibility of employee's safety is now acknowledged as standard practice within Europe. Guardian Staff Safety Systems are proud to be associated with the development of products that comply with these regulations.

Who's **looking**
out for you?

Guardian Staff Safety Systems

THE ULTIMATE SOLUTION

Discreet, Safe, Reliable

- The Guardian trigger stays attached to your person after activation.
- It will continually track your movements when activated.
- The system can identify the caller as well as the location.
- Operates outside in open areas.
- Two levels of call - Assistance & attack.
- All events are recorded.

Uses TCP/IP protocols

TCP/IP protocol allows our systems to integrate harmoniously with other independent platforms and technologies

Personnel transmitter

Press for assistance
Pull for attack

Corridor Display

Ideal for areas requiring large-scale visual indication

Alarm Push

Emergency push for fixed locations

Mobile Communication

Allows staff to receive incident alarms on their portable units

Over-door Light/Sounder

Typically used outside rooms and as follow-me lights in corridors

Internal Receiver

Positioned in any location requiring coverage

Test Box

For staff to test their transmitters before going on duty

Display Unit

With integral sounder to show incident location and caller ID

Pop-up window for your PCs along with full graphical displays
