

GUARDIAN®
STAFF SAFETY SYSTEMS

Guardian group is a British manufacturer and one of the World's major suppliers of end user call alarms and staff attack systems. Our wide range of products exceed NHS and home office requirements and are extensively used by a wide customer base including Trusts and private healthcare providers across the UK for its diverse range of applications.

How has this been achieved?

The answer is simple – we listen to our customers.

Our development program is driven by a combination of the continuing advances in technology and our customer's needs. Many of the features which a Guardian system provides were incorporated in response to comments and requests from clients who were looking for solutions to combat particular issues. Therefore our systems incorporate many unique features which we believe provide our clients with cost effective systems that are reliable, easy to use and extremely maintenance friendly.
