

THE ECONOMY+ / 08 RANGE

OUR WIRELESS NURSE CALL RANGE DESIGNED SPECIFICALLY FOR THE CARE HOME SECTOR

Easy to use – Designed with simplicity in mind, the call buttons are clearly identifiable and easy to use for both residents and carers alike.

Information – Easy to view 'real time' reports are accessible at the click of a button, showing how many calls occur, how quickly they are responded to and which carer responded – enabling managers to make informed decisions and **providing clear accountability** to residents and their families.

Value – This competitively priced system is ideally suited to replacing an ageing or failing nurse call system quickly and reliably, bringing advanced nurse call features with **savings of up to 40%** against a hard wired alternative.

Simplicity – Our installation process is simple and clean with **no wiring required**, allowing us to work in an operational care home without disruption to staff and residents.

Flexibility – The modular nature of the system means it can be **added to and reconfigured with ease**, providing your homes with a system that can grow and adapt as you change layout and room use in the future.

Infection Control – The room units have a wipe clean front and **anti-microbial additives** in all surfaces and buttons, helping you in maintaining infection control standards throughout the home.

Customer Led Development – Research is at the forefront of our organisation and all new products are **developed in conjunction with our customers** – ensuring they met the exact needs of residents, carers and managers alike.

Professional Support – Our team of directly employed engineers in the Technical Assistance Centre at our Head Office are **available 24/7**, to give you all the support and assistance you require.

HOW DOES THE ECONOMY+ / 08 RANGE WORK?
